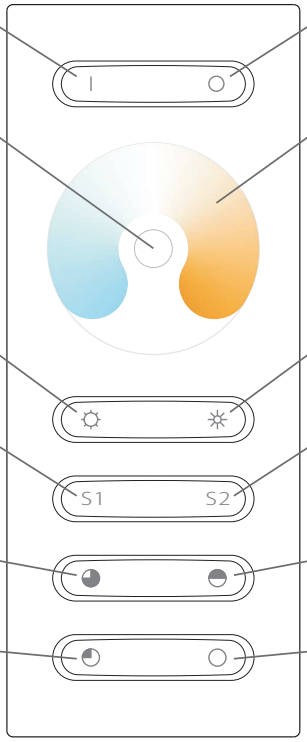
RoscoLED® VariWhite

2 Channel RF Remote Controller User Guidelines



Power On
Press to turn on power to the remote.

LED Indicator
This will illuminate orange to indicate a response between your finger and the remote. This ensures that your remote should be working properly. If it does not illuminate, click the power on button.

Brightness Up
Press and hold down to increase light intensity.

Scene 1

25% Brightness
Click to change from current brightness setting to 25% intensity.

75% Brightness
Click to change from current brightness setting to 75% intensity.

Power Off
Press to turn off the remote.

CCT Color Wheel
Touch to select color temperature. Drag finger to adjust between warm white spectrum (orange) and cool white spectrum (blue). This will allow you to utilize the full capacity of your RoscoLED tape Kelvin range in a more precise manor.

Brightness Down
Press and hold down to decrease light intensity.

Scene 2
Press and hold down to save current outputs. Click to recall the saved color/effect you saved. You can save up to two colors per scene by repeating this process for Scene 1.

50% Brightness
Click to change from current brightness setting to 50% intensity.

100% Brightness
Click to change from current brightness setting to 100% intensity.

PAIRING RF REMOTE CONTROLLER WITH RECEIVER:

1. Press the RF Code Key on Receiver.
2. Press any button on RF Controller. Connected lights on Receiver will blink once to confirm pairing was successful.
3. To Delete pairing press and hold RF Code Key on Receiver for 3 seconds. Connected lights will flash twice.

Note: One Controller can be paired with up to 10 Receivers.
